Supporting the general aviation ecosystem

# From Tip to Tail

## Supporting the general aviation ecosystem

At Boeing, we recognize that general aviation plays a vital role in connecting communities, enhancing business opportunities, and providing essential services. As the global leader in aviation products and services, we have positioned ourselves to be an integrated partner with our customers and vendors, representing varying market segments around the globe. We understand the needs of the general aviation market, from fractional ownership operators through to wildfire fighters and air ambulance providers. Our expansive range of products and services are available to meet the complexities of our customers.

We have nearly a century of experience in the general aviation sector, with a global inventory network and multiple service and fulfillment locations.

## **Aftermarket**

Boeing offers a wide range of products and services to support the maintenance of global fixed-wing and rotorcraft fleets. Whether you are an MRO facility, an operator, FBO, a flight school or an OEM providing aftermarket services, our team can help through our portfolio of integrated parts, piston and turbine engine parts and services, chemicals, digital tools and services underpinned by a team who's committed to quality and operational excellence..

## Flexibility and adaptability

- Through relationships with 3,000+ manufacturers for parts and chemicals, and access to the latest qualification data, Boeing can cater to your requirements and quantities as a single source supplier – thus reducing time, administration efforts and maintaining reliability
- Access a comprehensive coverage of chemicals and specialty materials across all customer platforms
- Minimize waste and reduce overall cost of chemical management by tailoring a solution that fits your needs

## Quality and reliability

- Global Trade Compliance
- Delegated Inspection Authority (select locations)
- Quality Assurance Service offerings form an integral part of our OEM/customer/ third-party approved Quality Management System
- Approved Source Listings (ASL) design provides value-add to customers
- Certified parts from approved suppliers and end-to-end quality control, ensuring safety and compliance
- We ensure you have the right documents and certifications for your parts and chemicals compliance
- Environmental compliance, e.g. REACH (EU) and TSCA (US)
- Ability to adapt to requirements and provide customized solutions

## Ease of access

- A broad selection of airframe parts, safety equipment, tooling, chemicals and specialty materials is available through your account rep or through our ecommerce platform – upload up to 250 part numbers in a single search or simply copy and paste your own list
- Real-time order status and full tracking capability for your shipments
- Fast and accurate e-commerce solutions tailored to your business
- 24hr access to \$1.3B+ inventory and access to a wide range of capabilities
- Product Repair Services (PRS) featuring battery, Wheel & Brake (W&B) and Aeroquip flex-line hose manufacturing
- We build, test and deliver more than 75,000 hose assemblies annually to ensure a solution is available to you
- A comprehensive range of paints and paint related products form one source, flexible order quantities (pints, quarts and gallons) offer right-sized painting solutions and quick response times

## Global network combined with local support

- Our global network combined with local support provides the quality products and reassurance that we can act and cater for when the need arises
- Ability to adapt to requirements and provide tailored delivery
- Rapid response – our AOG (Aircraft on Ground) support ensures that downtime is minimized
- A comprehensive rotating exchange pool of fixed wing and helicopter components to help you reduce maintenance downtime and inventory investment
- Increased efficiency, reduce overhead costs and manage inventories, whether in chemicals, color retention aerospace coatings or paint mixing, allowing you to focus on your core business

## Full chemical traceability

- Meets 49CFR, IATA, IMDG/IMO and many other regulatory requirements (e.g., REACH (EU) and TSCA (US))
- Supplying certified products to specifications in varying quantity to minimize scrapping
- Collaborative enhancements through our supply chain services from planning, procurement, strategic sourcing, operations and service, through to after-sale support, and data analytics

**Whether your needs are within the production or aftermarket arena, we can help through our extensive portfolio, including:**
