

ECT R-MC Compressor Wash

Available from Boeing

Lower your operating costs and increase your engine's efficiency with R-MC Compressor Wash.

Features and Benefits

- OEM tested and approved product for flight turbines
- Easy, fast and safe procedure - average cleaning time is less than 30 minutes!
- Requires no mixing prior to use and no rinsing after use (in most applications)
- Nonflammable, nontoxic and biodegradable
- Inhibits and reverses contaminant buildup
- Saves on fuel consumption
- Lengthens engine life
- Extends the time between overhauls

R-MC is formulated to be effective, economical and most importantly, environmentally safe

Rolls-Royce flight turbine operators have reported:

- 3% performance improvement over deteriorated engine condition
- Average ITT drop of 18° after one wash
- No engine deterioration due to deposits at 600 hour inspection

JT-8, CFM56 and CF-6 operators have reported:

- Decreased fuel consumption of 1-3%
- Lowered EGT of up to 10° C

PT6 operators have reported:

- Increase in TBO from 5000 to 7500 hours
- Absence of corrosion and salt deposits in severe environments

Approvals:

- Conforms to MIL-C-85704, Type 2 and 2A
- Tested and approved by leading Original Equipment Manufacturers (OEMs)

R-MC Compressor Wash

Part Number	Description
4070-05	5 Gallon Premixed Formula
4070-30	30 Gallon Premixed Formula
4072-01	1 Gallon Concentrated Formula (6:1)
4072-05	5 Gallon Concentrated Formula (6:1)
4072-30	30 Gallon Concentrated Formula (6:1)
4072-55	55 Gallon Concentrated Formula (6:1)
42172-05	5 Gallon Concentrated Formula (4:1)

Consult your engine manual and use in accordance with engine manufacturer's recommendations.
