P.E.D. Fire-Safe **AVAILABLE FROM AVIALL!**

Your best line of defense against lithium battery fires!

The P.E.D. Fire-Safe mitigates the dangers that lithium battery-operated electronic devices pose to the aviation industry. The P.E.D. Fire-Safe is designed to:

- **CONTAIN** a fire threat and the resultant smoke. The P.E.D. Fire-Safe has the ability to contain temperatures in excess of 3000° F and filter the resultant smoke.
- **RELOCATE** the fire threat away from passengers, crew and flight sensitive areas.
- **SUPPRESS** the fire within the P.E.D. Fire-Safe automatically. This allows the user to be proactive in dealing with a device that may be overheating, without fear of needlessly destroying it. If a fire is never fully realized, the internal cooling and extinguishing bladders will not activate within the P.E.D Fire-Safe.
- **MONITOR** by means of an internal temperature indication system which supplies real time internal temperature conditions to crew members.

“What makes this system unique is that it not only contains a battery fire and the resultant smoke, but also automatically cools and extinguishes it while providing positive confirmation of a fully extinguished fire, preventing possible injuries to passengers and crew from smoke inhalation.”

**— Brian Burkett, CEO
Fire Containment Concepts**

What makes the P.E.D. Fire-Safe the ultimate Fire Containment System?

- Specifically designed for the Aviation Industry, incorporating several fail-safe design features.
- P.E.D. Fire-Safe is not just a “Fire Containment Bag” it is a Fire Containment System.
- The P.E.D. Fire-Safe is easily trained and quickly deployed in emergency situations.
- The P.E.D. Fire-Safe is adaptable to handle different types, sizes and shapes of lithium battery powered devices.
- Effectively contains and filters the resultant and extremely toxic lithium smoke.
- Automatically deploys an FAA recommended aqueous extinguishing agent to cool and suppress.
- Self-monitoring Temperature Indication System — allows crew members to concentrate on safely operating the aircraft while ensuring the safe continuation of flight.
- Proactive - eliminates any hesitation or fear of needlessly destroying a P.E.D.
- Confidence - in knowing you are protected.

Features:

- Heavy duty carrying handles
- Triple seal fire and smoke technology
- Four stainless steel filtering vents
- Multiple layers of aviation grade fire resistant textiles
- Heavy duty UL certified zipper
- Three dedicated temperature sensors
- Temperature Indication System
- Patented automatic cooling and suppression bladders
- FAA recommended aqueous extinguishing agent
- Heavy duty thermal guard gloves rated to 2600° F
