

Bucking Bar Designs for Boeing Aircraft by Pacific Tool

Properly installed fasteners are critical to the integrity of an aircraft's structure. Using the right tools ensures your rivets get installed safely, quickly, and efficiently. Pacific Tool is Boeing's OEM source for over 1,200 different bucking bar designs, including features for ergonomics and access into hard-to-reach areas. We captured the top 10 most-used Boeing bucking bar designs, which include these best-in-class features:

- Machined & Heat Treated Solid 4340 Steel, Never Cast or Welded
- All Varieties Available in Tungsten for Heavy-Duty Applications
- Highly Polished & Rounded Work Surfaces to Eliminate Tool Scratching & Marking
- Optional Plastisol Coating Available for Further Workpiece Protection
- Included Holes for Safety Lanyard & Storage
