

TECH-TOOL PLASTICS

HELICOPTER REPLACEMENT WINDOWS

Introduction to Tech-Tool Plastics

We produce a full line of replacement windows for Bell, Airbus Helicopters, MD Helicopters, Robinson and Schweizer helicopters. Our product quality meets or exceeds that of the original manufacturer and at prices that are significantly lower. In addition, we have developed many exclusive specialty windows that are not available from other manufacturers. These windows enhance many helicopter operations and fulfill specific requirements requested by our customers. Our windows are FAA, EASA, ANAC and Transport Canada approved.

Unlike other manufacturers, helicopter replacement windows are our only business. We have been established, under the same ownership for over forty years. This history, plus our dedication to quality and our expertise in tooling play an important part in our product. It helps us produce windows that require little or no trimming to provide a perfect fit, reducing installation time and labor and insuring considerable savings for our customers.

Our reputation is built on superior quality and a level of service that is beyond compare. We stock a large inventory which allows us to respond promptly and fill most window orders quickly. If you have never used our replacement windows and need a dependable source that can keep your downtime to a minimum, give us a call.

Table of Contents

Bell Model 206A, B, L, L1, L3, L4.....	1	Bell Model OH58A, A+, C.....	9

How to use this catalog

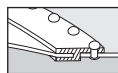

Depending upon the helicopter, several catalog pages may be devoted to windows for various models of the same aircraft. Windows listed in the Table of Contents cover basic helicopter window configurations. Names in the Table of Contents will lead you to the page where detailed window information can be found.

On individual catalog pages, the window name, part number and the OEM number it replaces, if available, are listed. (Some Tech-Tool windows are new designs that have no previous OEM number.)

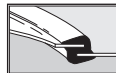

In addition, each catalog page provides a line drawing of the helicopter configuration, or a portion that gives the general location of the desired window. In most cases, window options for each of the locations have been illustrated, or referenced elsewhere. In a few minutes, a user should be able to identify, locate and be ready to order virtually any helicopter replacement window.

NOTE: At Tech-Tool, new additions to our quality line of helicopter replacement windows are continually being developed. If your specific window is not listed, call Customer Service for a list of new windows that have been added since this catalog's publication. Our toll-free number appears at the bottom of every right hand page.

PLEASE NOTE THE FOLLOWING SYMBOLS!

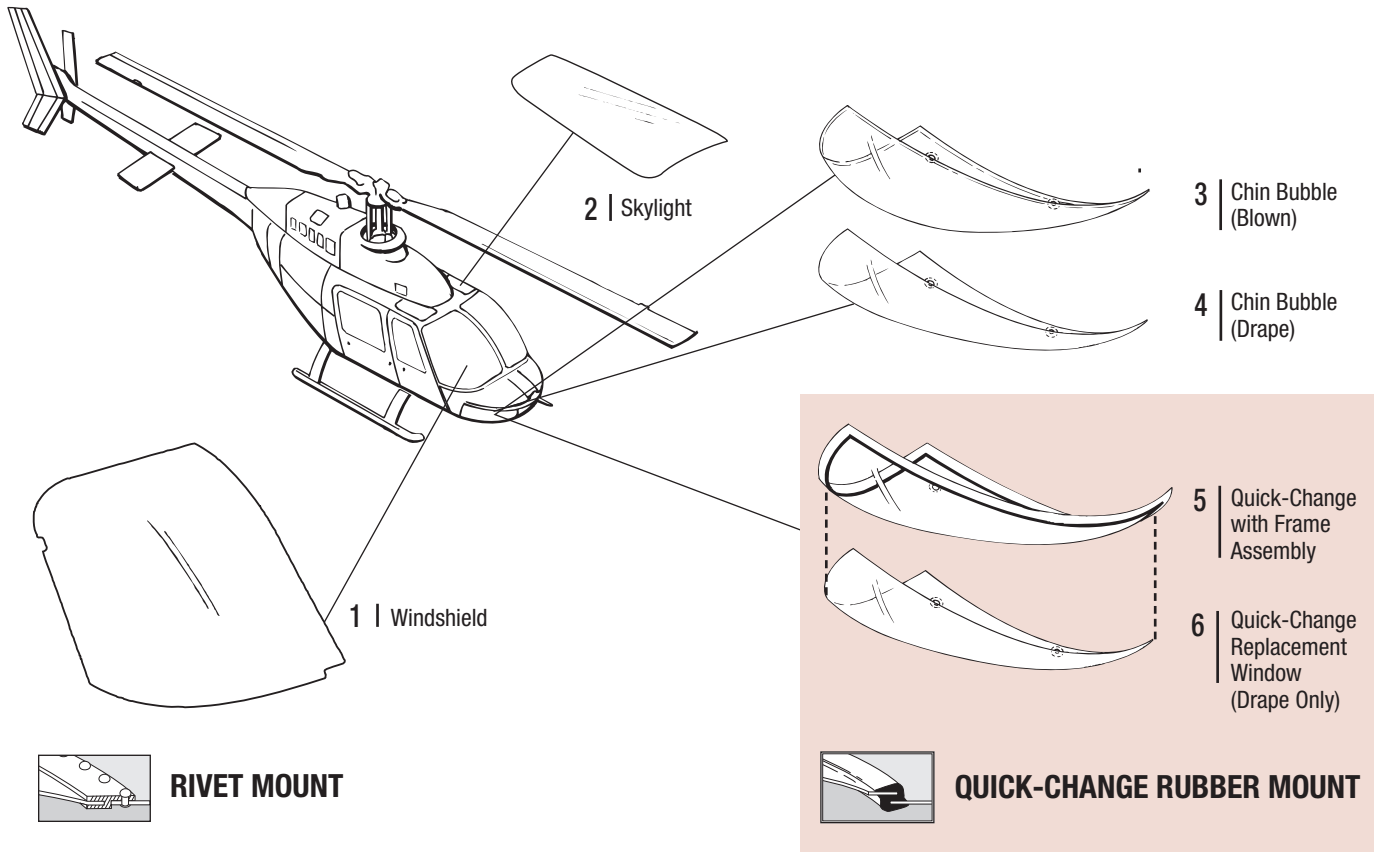

RIVET MOUNT

QUICK-CHANGE RUBBER MOUNT

These symbols apply to the method of installation required for the windows listed under the specific symbol.

BELL MODEL 206A, B, L, L1, L3, L4

1 | Windshield

Part Number		Replaces OEM No.
206B-1001-1	L/H	206-031-115-31,33
206B-1001-2	R/H	206-031-115-7,11,105

2 | Skylight

Part Number		Replaces OEM No.
206B-1003-1	L/H	206-031-108-27,33
206B-1003-2	R/H	206-031-108-28,34

3 | Chin Bubble (Blown)

Part Number		Replaces OEM No.
206B-1002-5	L/H	206-031-116-101, 109

WINDOW FEATURES

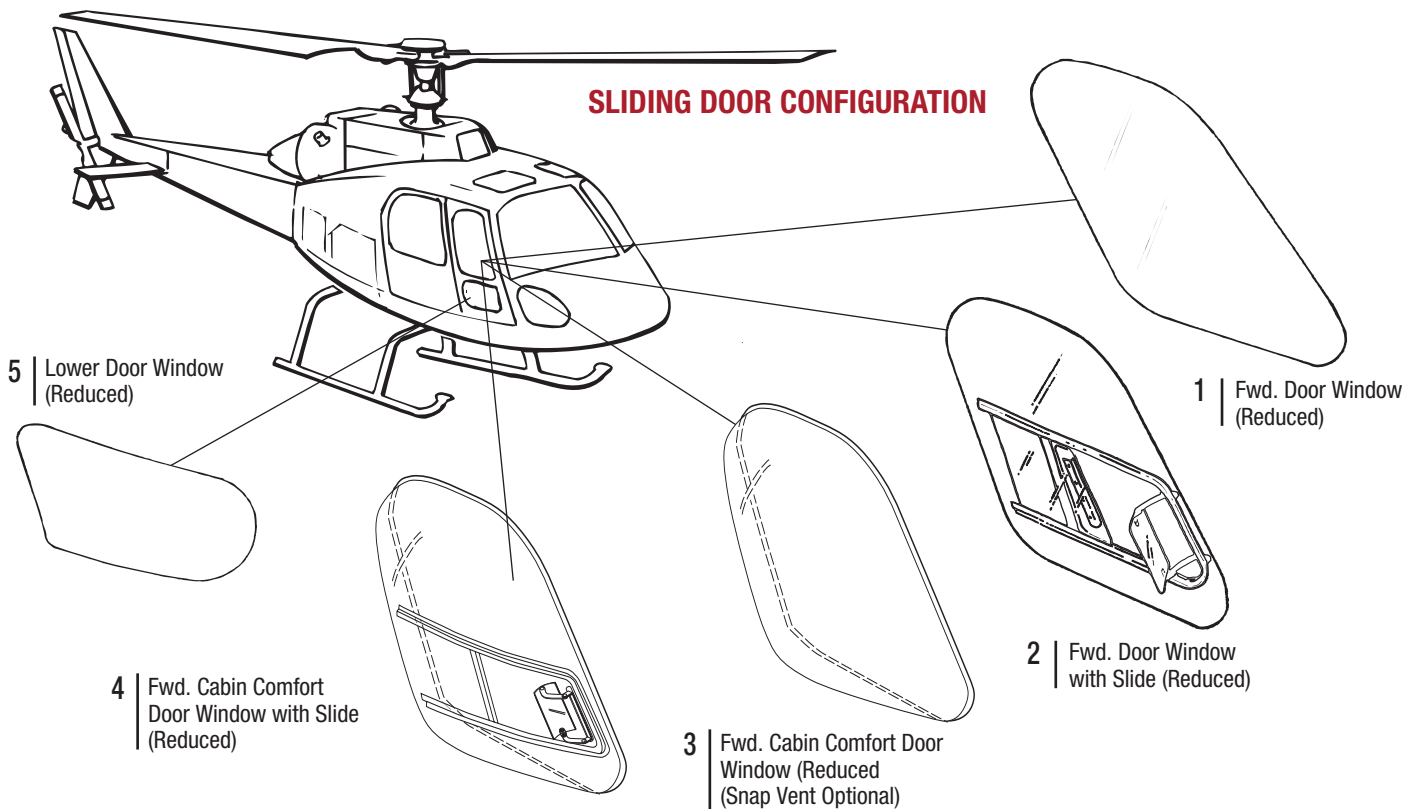

Fwd. Cabin Comfort Windows

Tech-Tool’s Fwd. Cabin Comfort Windows are completely “Clear View”. There are no visual obstructions from the usual upper painted area and lower opaque arm rest, allowing improved viewing from passenger seating.

Reverse Slide Camera Window

Tech-Tool’s Reverse Slide Camera Window allows ready access for aft passenger area photography. Unlike others, this camera window provides a large opening for easy maneuverability. Slide mechanism is located on the inside and eliminates air noise and vibration.

Windows available in clear or light smoke gray.
